Backend Engineer Job Description

Location: Bangalore, India or Mountain View, CA

Job Type: Full-time

About the Company: We are a startup focused on building consumer GenAl software and products for daily information needs. We are committed to delivering exceptional user experiences and innovative solutions. Join our dynamic team and help us shape the future of Al.

Job Summary: We are seeking a talented and motivated Backend Engineer to join our development team. The ideal candidate will have a strong background in server-side development, a passion for building robust and scalable backend systems, and a keen eye for performance optimization. You will work closely with frontend engineers, database administrators, and product managers to develop and maintain high-performance web applications. This role requires strong problem-solving skills, expertise in backend technologies, and the ability to work collaboratively in a fast-paced environment.

Responsibilities:

- 1. Design, develop, and maintain server-side logic, ensuring high performance and responsiveness.
- 2. Integrate user-facing elements developed by frontend engineers with server-side logic.
- 3. Implement data storage solutions and manage databases.
- 4. Optimize applications for maximum speed and scalability.
- 5. Collaborate with frontend engineers, product managers, and other team members to define and deliver new features.
- 6. Troubleshoot and debug applications to resolve any issues.
- 7. Write clean, maintainable, and well-documented code.

Qualifications:

- 1. Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent experience).
- 2. Strong proficiency in server-side programming languages (e.g., Python, Go)
- 3. Experience with database management systems (e.g., MySQL, PostgreSQL, MongoDB)
- 4. Knowledge of cloud services and infrastructure (e.g., GCP)
- 5. Familiarity with version control systems (e.g., Git).
- 6. Excellent problem-solving skills and attention to detail.
- 7. Strong communication and collaboration skills.

Preferred Qualifications:

- 1. Knowledge of testing frameworks
- 2. Experience with performance optimization techniques.

If you are passionate about creating exceptional user experiences and thrive in a dynamic and collaborative environment, we would love to hear from you. Apply today and join our team of talented individuals!
